

AMENDMENTS TO THE CLAIMS

1-15. (Canceled).

16. (Currently Amended) A hydrocarbon polymer composition including at least one component selected from a group consisting of a polyethylene resin, a polypropylene resin, a polybutylene resin, an ethylene-propylene copolymer resin, an ethylene-propylene copolymer rubber, and an ethylene-propylene-ethylidene norbornene copolymer rubber, ~~and a butyl rubber~~, and a modifier for hydrocarbon polymer comprising, as an active component, a modified cyclic structure-containing conjugated diene polymer wherein an amount of an α,β -ethylenically unsaturated carboxylic acid compound bonded by addition is from 0.1 to 20% by weight and a cyclization ratio is from 30 to 95%.

17. (Previously Presented) A hydrocarbon polymer composition including at least one component selected from a group consisting of a propylene homopolymer, an ethylene-propylene copolymer rubber, and an ethylene-propylene-ethylidene norbornene copolymer rubber; and a modifier for hydrocarbon polymer comprising, as an active component, a modified cyclic structure-containing conjugated diene polymer wherein an amount of an α,β -ethylenically unsaturated carboxylic acid compound bonded by addition is from 0.1 to 20% by weight and a cyclization ratio is from 30 to 95%.

18. (Currently Amended) A hydrocarbon polymer composition according to claim 16 ~~15~~, wherein a ratio of an acid anhydride group to a total amount of the α,β -ethylenically unsaturated carboxylic acid compound is 60% or more by weight.

19. (Currently Amended) A molding comprising the hydrocarbon polymer composition according to claim 16 ~~15~~.

20. (Previously Presented) The molding according to claim 19, which is coated with a covering material.

21. (Previously Presented) The molding according to claim 20, wherein the covering material contains a heat-hardening resin as a main component.

22. (Previously Presented) The molding according to claim 20, wherein the covering material is a coating material.

23. (Previously Presented) The molding according to claim 22, wherein the covering material is at least one material selected from a group consisting of an epoxy-based resin coating material, an acrylic-urethane-based resin coating material, a polyurethane-based coating material, an alkyd-melamine-based resin coating material, a polyester-melamine-based resin coating material, and a polyether-melamine-based resin coating material.

24. (Previously Presented) The molding according to claim 20, wherein the covering material is an adhesive.

25. (Previously Presented) The molding according to claim 24, wherein the adhesive is at least one adhesive selected from a group consisting of an epoxy-based adhesive, a urethane-based adhesive, an acrylic-based adhesive, and a cyano acrylate-based adhesive.
